Subject index Volume 233

Acetone
Secondary kinetic isotope effects in cation-bound dimers of acetone $(C_3H_6O)M(C_3D_6O)^+$ with M = H, Li, Na, K, Rb, Ag, and Cs, 103
Aeronomic molecules
Electron impact ionization studies with aeronomic molecules, 207
Air plasma
Evaluation of the roles of reactive species, heat, and UV radiation in the inactivation of bacterial cells by air plasmas at atmospheric pressure, 81
Alkali cations
Secondary kinetic isotope effects in cation-bound dimers of acetone $(C_3H_6O)M(C_3D_6O)^+$ with M = H, Li, Na, K, Rb, Ag, and Cs, 103
Anion reactions
Electron attachment to and anion reactions with SF_5Cl: electron-swarm and selected ion flow tube studies, 259
Ar^{2+}
Reaction of Ar^{2+} with C_{60} to produce C_{60}^{3+}: first observation of double electron-transfer ionization?, 33
Argon
Angular momentum coupling and electron-impact excitation cross sections of rare-gas atoms, 75
Aromatic and aliphatic hydrocarbons
Destruction of hydrocarbons in non-thermal, ambient-pressure, capillary discharge plasmas, 305
Atoms
Revised high energy behavior of the Deutsch-Märk (DM) formula for the calculation of electron impact ionization cross sections of atoms, 13

Bacteria
Selected ion flow tube, SIFT, studies of the reactions of H_3O^+, NO^+ and O_2^+ with compounds released by *Pseudomonas* and related bacteria, 245
BCl_3
The formation of boron containing fragment ions from the ionization of BCl_3, 145
Branching ratios
Electron attachment to and anion reactions with SF_5Cl: electron-swarm and selected ion flow tube studies, 259
Breakdown curve
Hyperthermal collisions of atomic clusters and fullerenes, 1

C_{60}
Hyperthermal collisions of atomic clusters and fullerenes, 1
Reaction of Ar^{2+} with C_{60} to produce C_{60}^{3+}: first observation of double electron-transfer ionization?, 33
Caesium iodide clusters
The fragmentation dynamics of small $Cs(CsI)_n^+$ cluster ions under low-energy multiple collision conditions, 355
Capillary plasma
Destruction of hydrocarbons in non-thermal, ambient-pressure, capillary discharge plasmas, 305
Carbon chains
Sulfur terminated nanowires in the gas phase: laser spectroscopy and mass spectrometry, 131
Cavity ring-down spectrometer
Afterglow studies of $H_3^+(v = 0)$ recombination using time resolved cw-diode laser cavity ring-down spectroscopy, 299

$CBrClF^-$
Parity violating effects in the molecular anion $CBrClF^-$, 385
Charge transfer
Selected ion flow tube, SIFT, studies of the reactions of H_3O^+, NO^+ and O_2^+ with compounds released by *Pseudomonas* and related bacteria, 245
Charged clusters
Signature of cluster isomers in time-resolved photodissociation experiments, 117
Charging
Charging of micro-particles in plasma–dust interaction, 51
CHBrClF
Parity violating effects in the molecular anion $CBrClF^-$, 385
$CHCLBr_2$
Temperature dependence of electron attachment to $CHCLBr_2$: crossed beams study, 193
Chemical reactions at surfaces
Surface collisions of small cluster ions at incident energies 10–10^2 eV, 361
Cluster
Hyperthermal collisions of atomic clusters and fullerenes, 1
Calculations of electron-impact cross sections for the fragmentation and dissociative ionization of fullerenes using a semi-empirical method, 293
Cluster anions
High resolution study of cluster anion formation in low-energy electron collisions with OCS clusters, 181
Cluster beams
Do we know the value of the Gspann parameter?, 215
Cluster ions
Surface collisions of small cluster ions at incident energies 10–10^2 eV, 361
Cluster reaction
Gas-phase studies of $Au_nO_m^+$ interacting with carbon monoxide, 99
CO oxidation
Gas-phase studies of $Au_nO_m^+$ interacting with carbon monoxide, 99
Coincidence technique
The formation of boron containing fragment ions from the ionization of BCl_3, 145
Collision
Hyperthermal collisions of atomic clusters and fullerenes, 1
Collisional electron detachment
Collisional electron detachment from NO^- by rare gases, 45
Compact and elongated conformers
Applying a new algorithm to H/D exchange of multiply protonated cytochrome *c*, 125
Corona
An analysis of mass spectrometric study of negative ions extracted from negative corona discharge in air, 317
Cross sections
Revised high energy behavior of the Deutsch-Märk (DM) formula for the calculation of electron impact ionization cross sections of atoms, 13
Measurements of absolute total and partial cross sections for the electron ionization of tungsten hexafluoride (WF_6), 25
Calculated cross sections for the electron-impact ionization of excited argon atoms using the DM formalism, 39

doi:10.1016/S1387-3806(04)00165-4

Electron impact ionization cross-sections of SF_3 and SF_5, 111
Crossed beams study
Temperature dependence of electron attachment to $CHCLBr_2$: crossed beams study, 193

DEA
Low energy electron driven reactions in free and bound molecules: from unimolecular processes in the gas phase to complex reactions in a condensed environment, 267
Desorption
Low energy electron driven reactions in free and bound molecules: from unimolecular processes in the gas phase to complex reactions in a condensed environment, 267
Diamine
Relative proton affinities from kinetic energy release distributions for dissociation of proton-bound dimers. 2. Diamines as a test case, 223
Differential cross-section
The ^1S–^1P electron excitations of Zn at small scattering angles, 253
Diffuse interstellar bands
Sulfur terminated nanowires in the gas phase: laser spectroscopy and mass spectrometry, 131
Discharge
Evaluation of the roles of reactive species, heat, and UV radiation in the inactivation of bacterial cells by air plasmas at atmospheric pressure, 81
Sulfur terminated nanowires in the gas phase: laser spectroscopy and mass spectrometry, 131
Discharge plasma
Vacuum ultraviolet emissions from a cylindrical dielectric barrier discharge in neon and neon–hydrogen mixtures, 395
Dissociation
Theoretical study on the structures and dissociation channels of metal dications solvated by acetonitrile ligands, 87
Relative proton affinities from kinetic energy release distributions for dissociation of proton-bound dimers. 2. Diamines as a test case, 223
Dissociative electron attachment
Temperature dependence of electron attachment to $CHCLBr_2$: crossed beams study, 193
Double electron-transfer ionization
Reaction of Ar^{2+} with C_{60} to produce C_{60}^{3+}: first observation of double electron-transfer ionization?, 33
Double-electron capture
Evidence for double-electron capture in the H_9^+–He collision, 233
Dry air
An analysis of mass spectrometric study of negative ions extracted from negative corona discharge in air, 317
Dusty plasmas
Charging of micro-particles in plasma–dust interaction, 51
Dynamics approach
Relative proton affinities from kinetic energy release distributions for dissociation of proton-bound dimers. 2. Diamines as a test case, 223

EELS
An experimental study of SF_5CF_3 by electron energy loss spectroscopy, VUV photo-absorption and photoelectron spectroscopy, 335
Electron affinity
Electron attachment and detachment: C_6F_6, 67
Electron attachment
Electron attachment and detachment: C_6F_6, 67
High resolution study of cluster anion formation in low-energy electron collisions with OCS clusters, 181
Low energy electron attachment by bromoalkanes, 199
Electron attachment to and anion reactions with SF_5Cl: electron-swarm and selected ion flow tube studies, 259
Electron capture cross-sections
State-selective and total single-electron capture for impact of slow He^{2+} ($E \leq 1$ keV) on H_2, O_2 and CO, 239
Electron detachment
Electron attachment and detachment: C_6F_6, 67
Electron excitation
The ^1S–^1P electron excitations of Zn at small scattering angles, 253
Electron impact
Angular momentum coupling and electron-impact excitation cross sections of rare-gas atoms, 75
Calculations of electron-impact cross sections for the fragmentation and dissociative ionization of fullerenes using a semi-empirical method, 293
Electron impact ionization
Revised high energy behavior of the Deutsch-Märk (DM) formula for the calculation of electron impact ionization cross sections of atoms, 13
Electron ionization
Measurements of absolute total and partial cross sections for the electron ionization of tungsten hexafluoride (WF_6), 25
Calculated cross sections for the electron-impact ionization of excited argon atoms using the DM formalism, 39
Electron impact ionization cross-sections of SF_3 and SF_5, 111
The formation of boron containing fragment ions from the ionization of BCl_3, 145
Electron swarm
Low energy electron attachment by bromoalkanes, 199
Electrospray ionization
Secondary kinetic isotope effects in cation-bound dimers of acetone $(C_3H_6O)M(C_3D_6O)^+$ with M = H, Li, Na, K, Rb, Ag, and Cs, 103
Endohedral
Hyperthermal collisions of atomic clusters and fullerenes, 1
Energy transfer
Hyperthermal collisions of atomic clusters and fullerenes, 1
ESI
Applying a new algorithm to H/D exchange of multiply protonated cytochrome *c*, 125
Excess kinetic energy
Discrimination effects for ions with initial kinetic energy produced by electron ionization of C_2H_2 in a Nier-type ion source, 325
Excimer emission
Vacuum ultraviolet emissions from a cylindrical dielectric barrier discharge in neon and neon–hydrogen mixtures, 395
Excitation
Elementary processes at the origin of the generation and dynamics of multiple double layers in DP machine plasma, 343
Excitation cross section
Angular momentum coupling and electron-impact excitation cross sections of rare-gas atoms, 75
Excited states
Calculated cross sections for the electron-impact ionization of excited argon atoms using the DM formalism, 39

Fast flow
Applying a new algorithm to H/D exchange of multiply protonated cytochrome *c*, 125
Flicker noise
Elementary processes at the origin of the generation and dynamics of multiple double layers in DP machine plasma, 343
Flowing-afterglow Langmuir probe technique
Electron attachment and detachment: C_6F_6, 67
Fragment ions
Discrimination effects for ions with initial kinetic energy produced by electron ionization of C_2H_2 in a Nier-type ion source, 325
Fragmentation
Signature of cluster isomers in time-resolved photodissociation experiments, 117
Fragmentation mechanism
The fragmentation dynamics of small $Cs(CsI)_n^+$ cluster ions under low-energy multiple collision conditions, 355
Free radicals
Electron impact ionization cross-sections of SF_3 and SF_5, 111

Frequency shifts
Parity violating effects in the molecular anion $CBrClF^-$, 385
Fuel reforming
Hydrogen generation in a microhollow cathode discharge in high-pressure ammonia–argon gas mixtures, 19
Fullerene
Hyperthermal collisions of atomic clusters and fullerenes, 1
Ionization energies of the C_{60} fullerene and its hydrogenated derivatives $C_{60}H_{18}$ and $C_{60}H_{36}$ determined by electron ionization, 165
Calculations of electron-impact cross sections for the fragmentation and dissociative ionization of fullerenes using a semi-empirical method, 293
Fusion plasma diagnostics
H^+–$He(1s^2)$ collisions: CTMC calculations of single ionisation and excitation cross sections, 137

Gas phase
Gas-phase studies of $Au_nO_m^+$ interacting with carbon monoxide, 99
Gas temperature dependence
Temperature dependence of electron attachment to $CHCLBr_2$: crossed beams study, 193
Gold cluster
Gas-phase studies of $Au_nO_m^+$ interacting with carbon monoxide, 99
Gspann parameter
Do we know the value of the Gspann parameter?, 215

H_3^+ ions
Afterglow studies of $H_3^+(v = 0)$ recombination using time resolved cw-diode laser cavity ring-down spectroscopy, 299
H_9^+–He collision
Evidence for double-electron capture in the H_9^+–He collision, 233
H/D exchange
Applying a new algorithm to H/D exchange of multiply protonated cytochrome *c*, 125
Halocarbons
Low energy electron attachment by bromoalkanes, 199
Halogenated methanes
A selected ion flow tube study of the reactions of OH^- with a number of fully and partially halogenated methanes, 155
He excitation by proton impact
H^+–$He(1s^2)$ collisions: CTMC calculations of single ionisation and excitation cross sections, 137
He ionisation by proton impact
H^+–$He(1s^2)$ collisions: CTMC calculations of single ionisation and excitation cross sections, 137
Highly charged ions
Charge driven fragmentation of biologically relevant molecules, 173
$HOClH^+$
Mode-selective stereomutation tunneling and parity violation in $HOClH^+$ and H_2Te_2 isotopomers, 373
Hollow cathode discharge
Hydrogen generation in a microhollow cathode discharge in high-pressure ammonia–argon gas mixtures, 19
H_2Te_2
Mode-selective stereomutation tunneling and parity violation in $HOClH^+$ and H_2Te_2 isotopomers, 373
Hydrogen
Hydrogen generation in a microhollow cathode discharge in high-pressure ammonia–argon gas mixtures, 19
Vacuum ultraviolet emissions from a cylindrical dielectric barrier discharge in neon and neon–hydrogen mixtures, 395
Hydrogen cluster ions
Evidence for double-electron capture in the H_9^+–He collision, 233
Hydrogen plasma
Afterglow studies of $H_3^+(v = 0)$ recombination using time resolved cw-diode laser cavity ring-down spectroscopy, 299
Hydrogenated fullerenes
Ionization energies of the C_{60} fullerene and its hydrogenated derivatives $C_{60}H_{18}$ and $C_{60}H_{36}$ determined by electron ionization, 165

Infrared absorption spectroscopy
Afterglow studies of $H_3^+(v = 0)$ recombination using time resolved cw-diode laser cavity ring-down spectroscopy, 299
Ion discrimination
Discrimination effects for ions with initial kinetic energy produced by electron ionization of C_2H_2 in a Nier-type ion source, 325
Ion solvation
Theoretical study on the structures and dissociation channels of metal dications solvated by acetonitrile ligands, 87
Ionization
Elementary processes at the origin of the generation and dynamics of multiple double layers in DP machine plasma, 343
Ionization cross sections
Calculations of electron-impact cross sections for the fragmentation and dissociative ionization of fullerenes using a semi-empirical method, 293
Discrimination effects for ions with initial kinetic energy produced by electron ionization of C_2H_2 in a Nier-type ion source, 325
Ionization energy
Ionization energies of the C_{60} fullerene and its hydrogenated derivatives $C_{60}H_{18}$ and $C_{60}H_{36}$ determined by electron ionization, 165
Ion-molecule reactions
A selected ion flow tube study of the reactions of OH^- with a number of fully and partially halogenated methanes, 155
Isomers
Signature of cluster isomers in time-resolved photodissociation experiments, 117
Isotope effects
Secondary kinetic isotope effects in cation-bound dimers of acetone $(C_3H_6O)M(C_3D_6O)^+$ with M = H, Li, Na, K, Rb, Ag, and Cs, 103
Isotopes
Mode-selective stereomutation tunneling and parity violation in $HOClH^+$ and H_2Te_2 isotopomers, 373

Kinetic energy release
Do we know the value of the Gspann parameter?, 215
Kinetic energy release distribution (KERD)
Relative proton affinities from kinetic energy release distributions for dissociation of proton-bound dimers. 2. Diamines as a test case, 223
Kinetic method
Secondary kinetic isotope effects in cation-bound dimers of acetone $(C_3H_6O)M(C_3D_6O)^+$ with M = H, Li, Na, K, Rb, Ag, and Cs, 103
Relative proton affinities from kinetic energy release distributions for dissociation of proton-bound dimers. 2. Diamines as a test case, 223
Krypton
Angular momentum coupling and electron-impact excitation cross sections of rare-gas atoms, 75

Levitated droplets
The index of refraction of supercooled solutions determined by the analysis of optical rainbow scattering from levitated droplets, 61
Low-energy collisions
The fragmentation dynamics of small $Cs(CsI)_n^+$ cluster ions under low-energy multiple collision conditions, 355
Lyman-α line
Vacuum ultraviolet emissions from a cylindrical dielectric barrier discharge in neon and neon–hydrogen mixtures, 395

Mass spectrometry
Hydrogen generation in a microhollow cathode discharge in high-pressure ammonia–argon gas mixtures, 19
Secondary kinetic isotope effects in cation-bound dimers of acetone $(C_3H_6O)M(C_3D_6O)^+$ with M = H, Li, Na, K, Rb, Ag, and Cs, 103
Evidence for double-electron capture in the H_9^+–He collision, 233

Metal cations
Theoretical study on the structures and dissociation channels of metal dications solvated by acetonitrile ligands, 87
Microorganism
Evaluation of the roles of reactive species, heat, and UV radiation in the inactivation of bacterial cells by air plasmas at atmospheric pressure, 81
Molecular ions
Parity violating effects in the molecular anion $CBrClF^-$, 385
Molecular trications
Reaction of Ar^{2+} with C_{60} to produce C_{60}^{3+}: first observation of double electron-transfer ionization?, 33
Multiple double layers
Elementary processes at the origin of the generation and dynamics of multiple double layers in DP machine plasma, 343
Multiply charged ions
Theoretical study on the structures and dissociation channels of metal dications solvated by acetonitrile ligands, 87
Multiply ionization
The formation of boron containing fragment ions from the ionization of BCl_3, 145
Multiply protonated cyt *c*
Applying a new algorithm to H/D exchange of multiply protonated cytochrome *c*, 125

Nanoparticles
Signature of cluster isomers in time-resolved photodissociation experiments, 117
Nanowires
Sulfur terminated nanowires in the gas phase: laser spectroscopy and mass spectrometry, 131
Negative ions
Low energy electron attachment by bromoalkanes, 199
Neon
Angular momentum coupling and electron-impact excitation cross sections of rare-gas atoms, 75
Vacuum ultraviolet emissions from a cylindrical dielectric barrier discharge in neon and neon–hydrogen mixtures, 395
NO^-
Collisional electron detachment from NO^- by rare gases, 45
Non-linear oscillations
Elementary processes at the origin of the generation and dynamics of multiple double layers in DP machine plasma, 343
Non-thermal plasma
Destruction of hydrocarbons in non-thermal, ambient-pressure, capillary discharge plasmas, 305
Nucleobases
Charge driven fragmentation of biologically relevant molecules, 173
Nucleophilic substitution
A selected ion flow tube study of the reactions of OH^- with a number of fully and partially halogenated methanes, 155

OCS clusters
High resolution study of cluster anion formation in low-energy electron collisions with OCS clusters, 181
Optical rainbow scattering
The index of refraction of supercooled solutions determined by the analysis of optical rainbow scattering from levitated droplets, 61
Optical spectroscopy
Sulfur terminated nanowires in the gas phase: laser spectroscopy and mass spectrometry, 131
Ozone
An analysis of mass spectrometric study of negative ions extracted from negative corona discharge in air, 317

Parity violation
Mode-selective stereomutation tunneling and parity violation in $HOClH^+$ and H_2Te_2 isotopomers, 373
Parity violating effects in the molecular anion $CBrClF^-$, 385
Partial ionization cross-sections
The formation of boron containing fragment ions from the ionization of BCl_3, 145
Photoelectron spectroscopy
An experimental study of SF_5CF_3 by electron energy loss spectroscopy, VUV photo-absorption and photoelectron spectroscopy, 335
Photolysis rate
An experimental study of SF_5CF_3 by electron energy loss spectroscopy, VUV photo-absorption and photoelectron spectroscopy, 335
Plasma chemistry
Hydrogen generation in a microhollow cathode discharge in high-pressure ammonia–argon gas mixtures, 19
Plasma processing
Measurements of absolute total and partial cross sections for the electron ionization of tungsten hexafluoride (WF_6), 25
Charging of micro-particles in plasma–dust interaction, 51
Electron impact ionization cross-sections of SF_3 and SF_5, 111
Plasma–wall interactions
Charging of micro-particles in plasma–dust interaction, 51
Proton transfer
Selected ion flow tube, SIFT, studies of the reactions of H_3O^+, NO^+ and O_2^+ with compounds released by *Pseudomonas* and related bacteria, 245
Proton-bound dimer
Secondary kinetic isotope effects in cation-bound dimers of acetone $(C_3H_6O)M(C_3D_6O)^+$ with M = H, Li, Na, K, Rb, Ag, and Cs, 103
Relative proton affinities from kinetic energy release distributions for dissociation of proton-bound dimers. 2. Diamines as a test case, 223
Pseudomonas
Selected ion flow tube, SIFT, studies of the reactions of H_3O^+, NO^+ and O_2^+ with compounds released by *Pseudomonas* and related bacteria, 245

Quasiadiabatic channels
Mode-selective stereomutation tunneling and parity violation in $HOClH^+$ and H_2Te_2 isotopomers, 373

Rare gases
Calculated cross sections for the electron-impact ionization of excited argon atoms using the DM formalism, 39
Collisional electron detachment from NO^- by rare gases, 45
Reaction entropy
Relative proton affinities from kinetic energy release distributions for dissociation of proton-bound dimers. 2. Diamines as a test case, 223
Reaction path Hamiltonian
Mode-selective stereomutation tunneling and parity violation in $HOClH^+$ and H_2Te_2 isotopomers, 373
Reactive species
Evaluation of the roles of reactive species, heat, and UV radiation in the inactivation of bacterial cells by air plasmas at atmospheric pressure, 81
Recombination
Afterglow studies of $H_3^+(v = 0)$ recombination using time resolved cw-diode laser cavity ring-down spectroscopy, 299
Refractive index
The index of refraction of supercooled solutions determined by the analysis of optical rainbow scattering from levitated droplets, 61
Relative energies
Relative proton affinities from kinetic energy release distributions for dissociation of proton-bound dimers. 2. Diamines as a test case, 223

SIFT
Reaction of Ar^{2+} with C_{60} to produce C_{60}^{3+}: first observation of double electron-transfer ionization?, 33
Selected ion flow tube, SIFT, studies of the reactions of H_3O^+, NO^+ and O_2^+ with compounds released by *Pseudomonas* and related bacteria, 245

SIFT-MS
Selected ion flow tube, SIFT, studies of the reactions of H_3O^+, NO^+ and O_2^+ with compounds released by *Pseudomonas* and related bacteria, 245
Single-electron capture
State-selective and total single-electron capture for impact of slow He^{2+} ($E \leq 1$ keV) on H_2, O_2 and CO, 239
Site-specific rate constants
Applying a new algorithm to H/D exchange of multiply protonated cytochrome *c*, 125
Slow He^{2+} ions
State-selective and total single-electron capture for impact of slow He^{2+} ($E \leq 1$ keV) on H_2, O_2 and CO, 239
Spectroscopy
An experimental study of SF_5CF_3 by electron energy loss spectroscopy, VUV photo-absorption and photoelectron spectroscopy, 335
Spherical complex potential
Electron impact ionization studies with aeronomic molecules, 207
Stability
Theoretical study on the structures and dissociation channels of metal dications solvated by acetonitrile ligands, 87
Stereomutation
Mode-selective stereomutation tunneling and parity violation in $HOClH^+$ and H_2Te_2 isotopomers, 373
Sterilization
Evaluation of the roles of reactive species, heat, and UV radiation in the inactivation of bacterial cells by air plasmas at atmospheric pressure, 81
Substrate
Low energy electron driven reactions in free and bound molecules: from unimolecular processes in the gas phase to complex reactions in a condensed environment, 267
Sulfur
Sulfur terminated nanowires in the gas phase: laser spectroscopy and mass spectrometry, 131
Supercooled solutions
The index of refraction of supercooled solutions determined by the analysis of optical rainbow scattering from levitated droplets, 61
Surface collisions
Surface collisions of small cluster ions at incident energies $10–10^2$ eV, 361
Synchrotron radiation
An experimental study of SF_5CF_3 by electron energy loss spectroscopy, VUV photo-absorption and photoelectron spectroscopy, 335

Thermionic emission
Hyperthermal collisions of atomic clusters and fullerenes, 1
Time-of-flight spectrometry
Charge driven fragmentation of biologically relevant molecules, 173
Total ionization cross-section
Electron impact ionization studies with aeronomic molecules, 207
Translational energy spectroscopy
State-selective and total single-electron capture for impact of slow He^{2+} ($E \leq 1$ keV) on H_2, O_2 and CO, 239
Tungsten hexafluoride
Measurements of absolute total and partial cross sections for the electron ionization of tungsten hexafluoride (WF_6), 25

Unimolecular dissociation
Surface collisions of small cluster ions at incident energies $10–10^2$ eV, 361

Volatile organic compounds (VOC)
Destruction of hydrocarbons in non-thermal, ambient-pressure, capillary discharge plasmas, 305
VUV photo-absorption
An experimental study of SF_5CF_3 by electron energy loss spectroscopy, VUV photo-absorption and photoelectron spectroscopy, 335

Zinc atom
The $^1S–^1P$ electron excitations of Zn at small scattering angles, 253
